RAMIS

concentrate

Concentrate Products

Concentrate is the action of extracting water from the cells of fruit flesh. In fruit concentrate, all seeds, peels, kernels and... are removed and the juice produced has a high nutritional value. The concentrates produced by Ramis Company are transparent and produced with Brix of 65-70 according to the international standards and are offered in international markets. Ramis Trading Company produces concentrates of various fruits including apples, oranges, cherries, pomegranates, red and white grapes, ordinary and golden peaches, as well as dates, and packages them with the best and most advanced machines. Ramis products are produced in accordance with international standards and are tested in the advanced laboratories of this company to ensure the health of the products.

Concentrate applications

- **Fruit and juice drinks, nectars, smoothies, mix of different drinks, coffee and tea**
- **Dairy products and yogurt**
- **Ice cream, cafes and juice shops**
- **Creamy chocolate with fruit flavors, ice pop, popsicle and ice cream coats**
- **Fillings for cakes and cookies and bakery products, salad decorations, sauces and marinades**
- **Candies and pastries**
- **Jam, marmalade, jelly and transparent fruit coating (glaze)**
- **Fruit pies and bakery as well as culinary products**

Apple concentrate

Crispy and delicious apple fruit is very important for people because of its antioxidants and phytonutrients. Apples contain edible fiber, vitamin C, beta carotene, B vitamins and vitamin B6. Apple concentrate is a widely used material in the food industry with a neutral color and taste. It can be used as a sweetener or fortifying features of other fruits in candy, fresh frozen products, fruit snacks, jams, marmalades, sauces and beverages.

Orange Concentrate

Orange concentrate produced by Ramis Trading Company is a thick orange-yellow liquid used in the food product, giving aroma, taste and color of ripe orange to the food. This type of orange concentrate is stored in a metal barrel with non-aseptic packaging as a freezer in the refrigerator. To produce orange concentrate, a certain amount of water in the orange juice is removed during the process of producing the orange concentrate, and as a result, the orange concentrate is less than the juice in volume. This product is produced based on international standards with a very high quality.

Properties of Ramis Orange Concentrate

- **Brix 60%**
- **Packing with aseptic and non-aseptic method**
- **A good source of vitamin C and folate**
- **Good source of magnesium and potassium**
- **Orangey yellow color**
- **Suitable for preparing orange juice, syrup and nectar**
- **Cloudy concentrate**

Can be used in confectionery, culinary products, juices, smoothies, nectars, fruit drinks, fruit fillings, ice cream coats, jams and marmalades, sauces and marinades, desserts, and chocolates.

Cherry Concentrate

Cherries are rich in natural antioxidants. The anthocyanin in cherries protects the body against stress and damage, removes free radicals, protects blood vessels and brain cells from stress, and prevents the formation of atherosclerotic plaques and diseases related to dementia.

Pomegranate Concentrate

Pomegranates are full of nutrients needed for good health. Different antioxidants in them protect the heart and prevent cancer. Pomegranates are rich in vitamin C and antioxidants, which can help delay the signs of aging. These antioxidants fight skin inflammation and treat acne and dark spots.

Properties of Ramis Pomegranate Concentrate

- **Brix 65%**
- **A good source of vitamins A, C and K.**
- **Good source of potassium, copper, manganese and magnesium**

Red and white grape concentrate

Excellent natural color and sweet taste of Ramis red and white grape is widely used in food products. Red grape concentrate allows you to label your product without adding color. Red grape concentrate is produced by filtering and concentrating sweet ripe red grapes and is very stable in terms of color, aroma and flavor.

Properties of red and white grape concentrate produced by Ramis Trading Company:

- Brix of 65%

Excellent coloring

- Good taste and aroma of red grapes
- A good source of a variety of natural antioxidants and vitamins A, B and C.

Ordinary and golden peach concentrate produced by Ramis Trading Company

Peach is an extremely useful fruit for the health and beauty of the skin. The intestines and gastrointestinal tract are also cleansed by consuming peaches. Peaches contain antioxidants such as chlorogenic acid, which are concentrated in the skin and flesh with anti-cancer properties. It is also a good source of vitamin A, which prevents lung and oral cancers.

Properties of ordinary and golden peach concentrate:

- **Brix 65%**
- **A good source of potassium**
- **Good taste and aroma**
- **A good source of a variety of natural antioxidants and vitamins A, B and E.**

Ramis Date Concentrate

Dates contain about 20 calories, 2.8 mg of calcium and 5 g of carbohydrates. This product is a good source of antioxidants, the most important of which is tannins. Tannins prevent cell damage and inflammation. Dates are a rich source of copper, magnesium, selenium and manganese.

All of these are essential for maintaining healthy bones and preventing diseases related to osteoporosis. Dates are also rich in vitamin K, a blood clot that helps fuel your body.

Properties of Ramis date concentrate

- Brix 65%
- Blood pressure regulator
- A good source of a variety of natural antioxidants and vitamin K.
